6 Debt Retirement Charge	\$7.00
GST 86590 9790 RT0001	\$6.61
Subtotal:	<u>\$116.83</u>

Total: \$116.83

- Adjustment Factor** was previously known as Loss Factor. When electricity is delivered over a power line, it is normal for a small amount of power to be consumed or lost as heat. Equipment, such as wires and transformers, consumes power before it gets to your home or business. The adjustment factor accounts for these losses.
- Historical Usage.** As part of its commitment to conservation and energy efficiency. Westario provides comparative usage data to enable its customers to conserve energy.
- Conservation Message.** Your bill will contain energy conservation tips to help you lower your energy costs.
- Delivery Charges** includes those charges previously known as Customer Fixed Monthly Service Charge, Distribution Charge, Transmission Connection Service Charge and Network Service Charge. These are the costs for delivering electricity from generating stations across the province to Westario Power then to your home or business. This includes the costs to build and maintain the transmission and distribution lines, towers and poles and operate provincial and local electricity system.
- Regulatory Charges** includes those charges previously known as Wholesale Market Service Charge and Administration Charge. These are the costs of administering the wholesale electricity system and maintaining the reliability of the provincial grid.
- Debt Retirement Charge** pays down the debt of the former Ontario Hydro.

Conservation Message 3

Check for drafts around windows, doors and electrical outlets.
